

25X1A

21 November 1967

25X1A Dear [REDACTED]

We are sending herewith the list of names and addresses for Christmas cards, etc., and must say that it took some work to get the data together; however, it will be useful to us all.

25X1C I do not believe you have ever met [REDACTED] at least no 25X1C evidence of it appears from his record and travel. I have met him only once to date as he has been fully occupied with the [REDACTED] leaving little time for office associations. Any word at home on who our next representative will be at [REDACTED] As you know, [REDACTED] was an aspirant to 25X1A this assignment before [REDACTED] was named.

25X1A You are correct that the new office space enhances our efforts here as we are more in the swim of office business and, I believe, have the most strategically located space in the entire [REDACTED] It has taken time to work up from the original attic space, but our position is now excellent, and we intend to remain here as long as the Directorate keeps a man in this position. You will understand better from the enclosed drawing how we are situated.

As we expect to do some briefings for people with rather limited backgrounds, we will gradually build up a library of VU-graphs and regular black and white photos to display. The VU-graphs we can obtain on loan from [REDACTED] However, 25X1A would you call OCR and ask them for any unclassified or Confidential 8x10 black and white photos (2 copies each) of the family of Soviet aircraft which are currently operational and Soviet Parade missiles--some of these to be used for wall display and others in briefing notebooks. We would be most appreciative.

We all send our best regards and wishes for pleasant holidays.

*Sincerely,*

25X1A
